Education

SRM Institute of Science and Technology

Bachelor of Technology in Artificial Intelligence

Chennai, TN

Aug 2024 – May 2028

Mahatma Gandhi Government School

Class 12th

Tonk, Rajasthan

2023 – 2024

Mahatma Gandhi Government School

Class 10th

Tonk, Rajasthan

2021 – 2022

Summary

AI-focused B.Tech student passionate about software development and intelligent applications. Skilled in Java, Python, and frontend/backend technologies with foundational knowledge in Machine Learning. Developed projects including an AI-powered chatbot and a traffic prediction system. Eager to learn and contribute through practical experience.

Experience

Deloitte Australia – Technology Job Simulation (Forage)

Virtual Experience Program

Aug 2025

- Completed real-world technology tasks simulating Deloitte workflows and business environments
- Applied analytical thinking and problem-solving approaches to practical scenarios
- Worked on technology-based case studies involving insights, solutions, and business understanding

Projects

PingBot | React.js, Node.js

- Developed an AI-powered chatbot for answering queries from uploaded documents
- Integrated backend APIs for document processing and response generation
- Designed an interactive chat interface with smooth real-time response handling

RouteWise | React.js, Machine Learning

- Developed a smart traffic prediction platform for route analysis
- Built a basic machine learning model for traffic forecasting
- Integrated route visualization and dashboard features

Technical Skills

Languages: Java, Python, C++, SQL (Basics)

Frameworks & Technologies: React.js (Basics), Node.js (Basics), HTML, CSS

Libraries: Pandas, NumPy, Matplotlib, scikit-learn

Developer Tools: GitHub, VS Code

Achievements

- Awarded **Special Mention** at HackNova 3.0 Hackathon conducted at SRMIST Chennai.
- Solved **100+ coding problems on LeetCode** using Java and C++.
- Secured **2nd Position** in a university-level hackathon for developing an innovative technical solution.
